Exam : **HP2-K35**

Title : Support and Service HP
StoreOnce Solutions

Vendor : HP

Version : DEMO

NO.1 What is stored on an HP StoreOnce Backup System G2 internal USB flash stick? (Select two.)

- A. All HBA, USB, and NIC firmware drivers for the HP StoreOnce device
- B. A copy of the serial.txt, license.txt. and saap.txt files
- C. Dsm.txt and so.log files from the HP StoreOnce appliance
- D. A version of Linux as the operating system
- E. A copy of the configuration of the D2D appliance

Answer: B,C

NO.2 Which type of target appears to the host as a supported tape library?

- A. NFS
- B. VTL
- C. CIFS
- D. NAS

Answer: B

NO.3 A service engineer is planning an upgrade from Replication Manager 2.1 to HP StoreOnce Enterprise Manager (SEM) at a customer site. What is helpful for the service engineer and the customer to know about the upgrade?

- A. Catalyst Replication can only be configured through HP SEM.
- B. The default user account will be the same as on the HP StoreOnce device.
- C. A support ticket collection feature is included.
- D. SEM communicates only via the default http/https Ports 80 and 443.

Answer: A

NO.4 A local retail company needs to replicate data between a current and a new HP StoreOnce device. What is the best method to seed the replicated data?

- A. Tape Replication
- B. Remote Location
- C. Low Bandwidth Replication
- D. Co-location

Answer: B

NO.5 Which function should NOT be performed through the HP StoreOnce device's iLO port?

- A. network gateway assignment
- B. remote console access
- C. hardware failure reporting

D. virtual power button shut down

Answer: B

NO.6 How do the HP StoreOnce Backup System Virtual Tape Devices appear to the host?

- A. network-attached physical tape library or autoloader
- B. loosely-attached physical tape library or autoloader
- C. locally-attached physical tape library or autoloader
- D. remote-attached physical tape library or autoloader

Answer: C

I&ac.admitted=1386825214270.876444892.492883150(page 10, vtl devices on an Ethernet network)

NO.7 A customer wants to use HP StoreOnce Catalyst on an HP StoreOnce 4420. Which benefits can Catalyst provide to the customer? (Select two.)

- A. Catalyst enables copies to be controlled by the backup application and multi-hop replication using Catalyst devices
- B. Catalyst enables stores to be created on all HP StoreOnce models with 10 Gbit network connectivity, including HP StoreOnce VSA
- C. enables low-bandwidth backup due to moving some of the deduplication processing to the source side without rehydration
- D. enables a maximum of five source Catalyst stores to be copied into a single target Catalyst store on an HP StoreOnce 4420 single node system
- E. enables end users to control the whole backup operation in HP Data Protector through a hardware interface

Answer: A,B

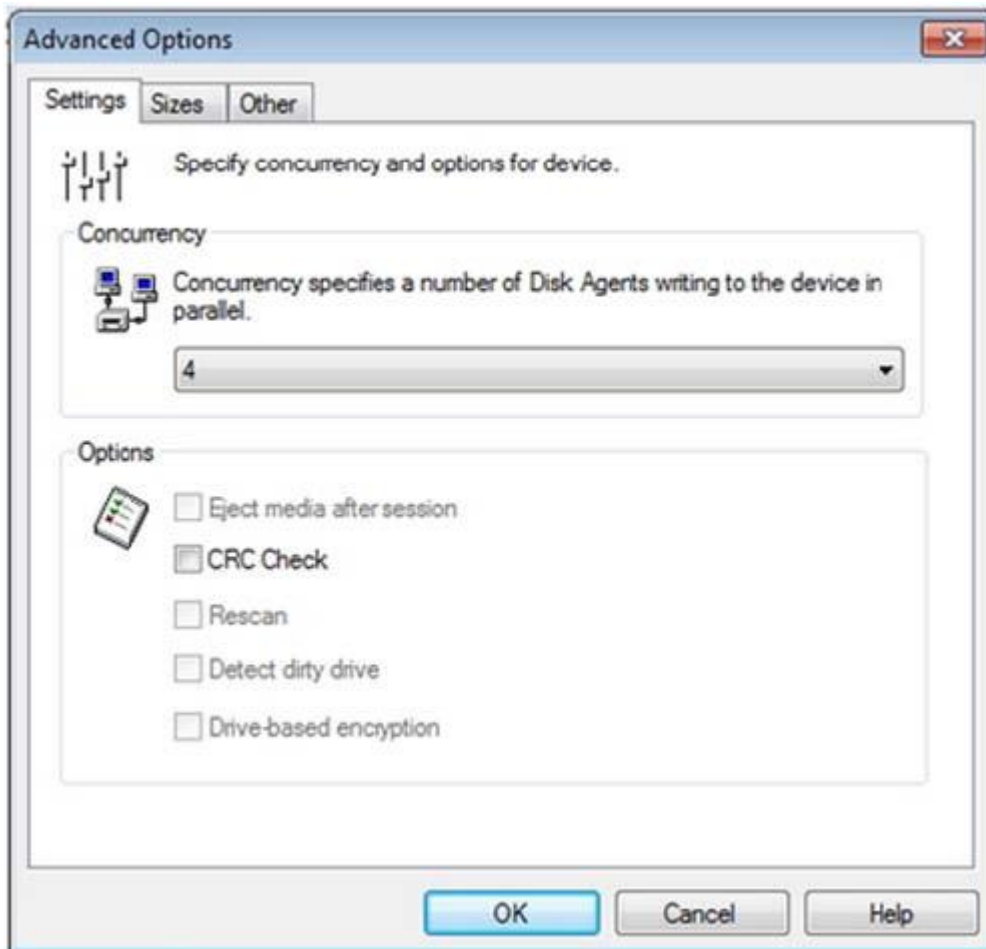

NO.8 A customer has three HP StoreOnce VSAs and ten HP StoreOnce 2620 systems across data centers in various countries. The customer plans to implement a new RoBo concept to replicate nine new branch offices to one single 2620 system. The RoBo concept will include the three VSAs.

What must the customer consider before implementing this HP StoreOnce replication solution?

- A. An HP StoreOnce VSA can only act as a replication source device.
- B. Catalyst replication between the HP StoreOnce VSA and the physical system needs SEM.
- C. Cross replication between all systems is always a best practice.
- D. Eight source appliances can replicate to a single HP StoreOnce 2620.

Answer: B

NO.9 Refer to the exhibit.

What should you do when configuring a VTL in HP Data Protector to ensure that the configuration complies with best practices?

- A. Verify that "Drive-based encryption" is used on the HP StoreOnce Backup System.
- B. Reduce used block size of the VTL to 64kB on the Sizes tab.
- C. Enable "Eject media after session" on the Settings tab.
- D. Reduce concurrency to one on the Settings tab.

Answer: A

NO.10 You implement HP StoreOnce Enterprise Manager (SEM) to monitor your HP StoreOnce devices. The customer plans to increase the amount of data backup. What is the functionality of SEM that will help the customer analyze the current situation?

- A. Seeding Ratio for Replication
- B. Support Ticket log file statistics
- C. Housekeeping and Tape Offloading
- D. Forecasts for better planning

Answer: D
